

# Acupuncture Improves Recovery, Physical Functioning in Stroke Patients!

According to April, 2005 Acupuncture Today, "Nearly five years ago, Emperor's College of Traditional Oriental Medicine received a \$40,000 grant from The Center for Integrative Health, Medicine and Research to conduct a pilot study to determine the effectiveness of acupuncture in the rehabilitation of stroke patients. The results of that study have been published in the official journal of the American Society of Neurorehabilitation, and suggest that acupuncture provides "statistically significant" benefits in physical functioning and recovery when used as an adjunct to conventional stroke rehabilitation measures."

## Does acupuncture really work to help stroke victims improve?

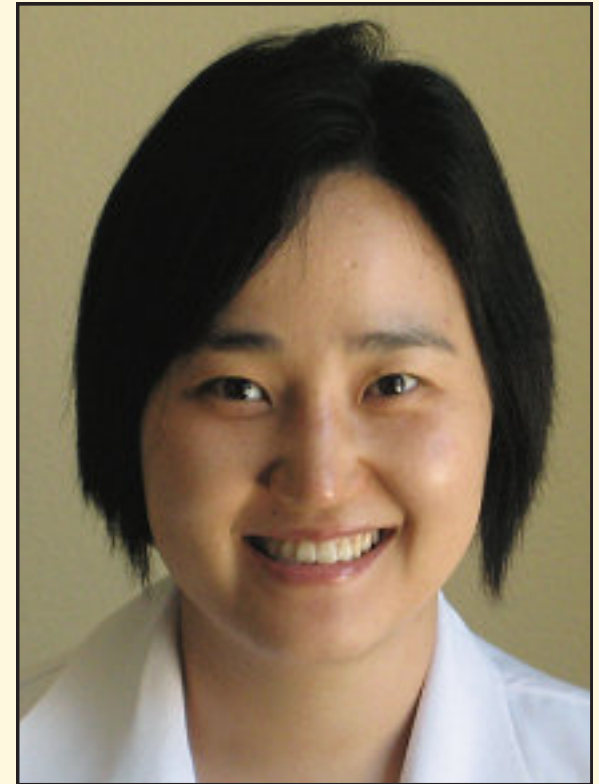

According to American Academy of medical Acupuncture, Dr. Russ Erickson, M.D., "Many studies involving thousands of patients have been published in China and Japan, and 2 of 3 studies from Scandinavia, demonstrated significant help. These studies indicate that patients get well faster, perform better in self-care, require less nursing and rehabilitation therapy, and use less healthcare dollars."

## Benefits of Acupuncture:

Post-Stroke Rehabilitation, Post-Operative Recovery, Pain Relief, Chronic Illness Support.

## So what is the cost?

\*The first 25 patients to schedule an appointment will receive a **FREE** initial exam and consultation, a value of up to \$125.

When you call, tell the scheduler you'd like to come in for the **Acupuncture Evaluation** so she can get you on the schedule and make sure you receive proper credit for this special offer.

Sincerely,  
Hyo J. Lee, M.S., L.Ac.
